ETL, US & Canada

Technical Data

Number of Blades	1 Blades
Number of Discs	8 Discs
Plug Type	NEMA 5-15P
RPM	1500 RPM
Speeds	1 Speed
Type	Combination Processors

Notes & Details

Cut down on prep time while cutting and mixing a variety of ingredients with the Avantco Revolution CFBB348D 1 hp combination commercial food processor! With 1 hp, this robust unit packs the requisite power to handle large quantities of fruits, vegetables, sauce, and soup. Additionally, the pulse button makes processing food even faster and easier, since you can pulse until your desired consistency is achieved. Its build includes a durable base with nonskid feet for secure use, while its direct drive motor with stainless steel motor shaft and stainless steel blades will hold up to the demands of commercial operations. The CFBB348D comes with a continuous feed attachment to further increase prep speed, as well as 5/32", 5/64" and 1/32" slicing discs, 9/32", 1/8", and 5/64" grating discs, 5/32" and 5/64" julienne discs, an S-blade, and a plastic ejector disc for improved flexibility. This item also comes with a disc rack for easy organization. The continuous feed attachment, which has a 6" x 3" kidney opening and 2" cylindrical opening, is ideal for processing vegetables like cucumbers, carrots, celery, and other similar product.

The 3 qt. bowl comes with a clear lid with an opening to monitor processing progress and add ingredients when necessary. The lid magnetically seals, and the blades will automatically stop when the magnet disengages to ensure safe use for the operator. Additionally, the blade will not spin until the lid is shut and the bowl is locked in place. The 3 qt. stainless steel bowl holds plenty of product at once and remains easy to clean.

The AvaMix CFBB348D is easy to control, as it has a simple on/off switch located conveniently on the side. It's also compact in size, measuring just 10" x 12" x 18 1/2", which makes it suitable for establishments that have limited counterspace. And because it disassembles, you can easily store it away when not use. The food processor requires a 120V connection for operation.

Included Discs/Blades:

- 5/32" slicing disc
- S-blade
- 5/64" grating disc
- 1/32" slicing disc
- 1/8" grating disc
- 3/16" grating disc
- 5/32" julienne disc
- 5/64" julienne disc
- 5/64" slicing disc
