RPM	8000 - 18000 RPM
Speeds	Variable
Type	Heavy-Duty

Notes & Details

Make short work of chopping, mixing or blending jobs right in the bowl or stock pot with this AvaMix IB18 variable speed heavy-duty immersion blender! Boasting a 18" stainless steel blending shaft that allows you to blend, crush, chop and puree foods with ease, this heavy-duty blender is a versatile tool that every commercial kitchen needs. Great for soups, sauces, batters, or mousses, this unit has a 1 1/4 hp motor for blending products at up to 18,000 RPM.

To ensure the operator with full control, this blender features a variable speed mechanism that allows you to adjust the rate with which you're whipping or emulsifying your products. For user safety, the unit requires two buttons to be pressed to start the unit, but once running, the enable button can be released and the unit is controlled just using the power button. The blending shaft easily detaches from the base so you can wash it in your sink, making clean up at the end of a long night a quick and effortless task. A 120V electrical connection is required for operation.
