Certifications

Technical Data

Horsepower	3/4 HP
Max Blend Capacity	21 Gallons
Plug Type	NEMA 5-15P
RPM	4000 - 16000 RPM
Speeds	Variable
Type	Standard Duty

Notes & Details

Make short work of chopping, mixing, or blending jobs right in the bowl or stock pot with this AvaMix IBMD16 16" medium-duty variable speed immersion blender! Boasting a 16" stainless steel blending shaft with sharp stainless steel blades that allow you to blend, crush, chop, and puree foods with ease, this medium-duty blender is a versatile tool that every commercial kitchen needs. Great for soups, sauces, batters, or mousses, this unit has a 3/4 hp motor that delivers superior power in its class and is capable of blending up to 21 gallons of product at up to 16,000 RPM with ease.

To provide the operator with full control, this blender features a variable speed mechanism that allows you to adjust the rate with which you're whipping or emulsifying your products with an easy turn of the dial on the handle. This makes it convenient and user friendly to adjust to the perfect speed while blending your product without any trouble. For user safety, the unit requires two buttons to be pressed to start the unit, but once running the enable button can be released and the unit is controlled just using the power button.

This unit also includes a lock button for convenient, hands-free operation. You can easily adjust the speed of the unit from the handle for a convenient, user-friendly experience. The cooling fans on the housing ensure that this unit is a workhorse but does not overheat, ensuring that this unit will stand up in your commercial kitchen.

The blending shaft easily detaches from the base so that it can be cleaned and stored efficiently. This also makes it easy to switch and swap to a different size blending shaft or whisk attachment (sold separately). An added benefit of this unit is the ability for its attachment to be cleaned in a dishwasher in addition to the ability to hand wash it in your sink. This unit design makes cleaning up at the end of a long night a quick and effortless task. A 120V electrical connection is required for operation.
