- Adjustable from 6" to 7"
- 1 ¼" wide feet ensures stability
- Durable stainless steel construction

## Plan View

## Notes & Details

These Avantco 177200900019 adjustable legs are a direct replacement for the ones that came standard with select Avantco fryers as well as FPC11 and FPC22 pasta cookers. They provide optimal stability and are adjustable between 6" and 7" to account for uneven flooring in your kitchen and get the perfect height for your fryer or pasta cooker. Its stainless steel construction ensures your unit is fully supported while giving you enough clearance to regularly clean beneath your unit. Replace a worn or damaged leg right away so that your unit rests at the height that is suitable for you.
