Notes & Details

Perfect for cafeterias, hotels, and banquet halls, the Avantco BMFW5 57" electric bain marie buffet countertop food warmer with 3 half size wells keeps food warm with little downtime to accommodate large groups of guests rotating through the dining area. This food warmer is built for countertop use and holds up to 2 full size and (1) 1/2 size food pans. It can also fit (5) 1/2 size, 4" deep food pans, which are included in stainless steel and topped off with covers. Depending on your menu and application, you can also use 1/3 size food pans. Whatever pans you use, the warmer provides the perfect station for holding hot dishes.

The unit even includes a glass sneeze guard, which protects the food from contaminants and encourages food safety. To keep the dishes delightfully warm for service, the unit features an easy-to-use thermostatic control, which adjusts the temperature between 120-212 degrees Fahrenheit. Not only does this allow you to protect food from the temperature danger zone, it also gives you the ability to customize the holding environment for a wide range of dishes.

This food warmer has three lights to help ensure proper function. One light shows when the unit is turned on, the second light shows when the unit is hot and ready for use, and the third light indicates low water levels so you know when you need to fill the bain marie with more water. At the end of the day, the warmer is easy to drain with a drain valve in the rear. It also wipes down easily thanks to its stainless steel design, and because stainless steel is corrosion-resistant, it provides long-lasting convenience. This food warmer requires a 120V electrical connection for operation. It's recommended that this connection be run on a dedicated circuit.
