## Notes & Details

Perfect for busy operations that are tight on space, this Avantco Chef Series CAG-24-MG 24" countertop gas griddle with manual controls adds easy compact convenience to your kitchen! The unit is space efficient, designed specifically for your kitchen countertop and allows you to maximize every inch of work space. With (2) 30,000 BTU burners, this griddle is ideal for whipping up burgers on one side and pancakes on the other. For quality performance, the griddle surface is 3/4" thick, ensuring quick recovery and convenient heat retention, saving you money and keeping your kitchen cool.

With a countertop design, the unit is space efficient, leaving room in your kitchen for additional equipment, supplies, or work surface area. It also allows placement on top of existing work tables and chef bases, ensuring that your space is maximized to its full potential. For quick and easy cleaning, this unit features a waste tray to collect food particles. Simply remove the tray, empty or rinse it, and return it back to its original spot.

Operation is simple and intuitive, thanks to the 2 large control knobs located on the front of the unit. These controls operate the burners independently, so you can set each side of the griddle to a different temperature and cook different items at the same time. Unlike other gas griddles that require liquid propane or natural gas, this unit ships ready for a natural gas connection, but can be converted to accept liquid propane. The unit uses a total 60,000 BTU for operation.
