Notes & Details

Perfect for busy operations that are tight on space, this Avantco Chef Series 60" countertop gas griddle with thermostatic controls adds easy compact convenience to your kitchen! The unit is space efficient, designed specifically for your kitchen countertop and allows you to maximize every inch of work space. With (5) 35,000 BTU burners, it is ideal for cooking burgers, pancakes, or vegetable skewers, as each burner can be set to a different temperature. For quality performance, the griddle surface is 3/4" thick, ensuring quick recovery and convenient heat retention, saving you money and keeping your kitchen cool.

With a countertop design, the unit is space efficient, leaving room in your kitchen for additional equipment, supplies, or work surface area. It also allows placement on top of existing work tables and chef bases, ensuring that your space is maximized to its full potential. For quick and easy cleaning, this unit features a waste tray to collect food particles. Simply remove the tray, empty or rinse it, and return it back to its original spot.

Operation is simple and intuitive, thanks to the 5 large control knobs located on the front of the unit. These controls operate the burners independently, so you can set each burner on the griddle to a different temperature and cook different items at the same time. This griddle features thermostatic controls which your cooks are sure to appreciate in a busy kitchen. Instead of constantly monitoring the temperature, like with manual controls, simply set the griddle to your desired temperature and it will maintain that temperature within a few degrees! Unlike other gas griddles that require liquid propane or natural gas, this unit ships ready for a natural gas connection, but can be converted to accept liquid propane. The unit uses a total 175,000 BTU for operation.
