Style	Standard
Total BTU	150000 BTU
Usage	Standard Duty

## Plan View

## Notes & Details

Perfect for busy operations that are tight on space, this Avantco Chef Series gas 36" 6 burner countertop range easily adds compact convenience to your kitchen! With a countertop design, the unit is space efficient, and with its (6) 25,000 BTU burners, it's ideal for whipping up sauces, sides, entrees, and even desserts. Operation is simple and intuitive, thanks to the 6 large control knobs located on the front of the unit, while standing pilots are centered between the controls for ease of use. Its countertop design leaves room in your kitchen for additional equipment, supplies, or work surface area. It also allows placement on top of existing work tables and chef bases, ensuring that your space is maximized to its full potential.

Unlike other gas ranges that require either liquid propane or natural gas, this unit can be converted to utilize either fuel type. It's also designed with a stainless steel exterior to withstand even the busiest of kitchen environments, ensuring that wherever it's used, it's sure to be a reliable addition to your cooking equipment repertoire.

Featuring a removable waste tray that makes clean-up quick and easy, the unit is outfitted with 4" legs that adjust to suit your needs. These lift the unit up from the countertop surface, making clean-up an easy task at the end of the day. The unit uses a total 150,000 BTU for operation. It ships ready for a natural gas connection, but is field convertible to accept liquid propane.
