Type	Adapter Plates

Notes & Details

This Avantco 6-hole steam table adapter plate makes it easy to adapt your steam table or warmer to fit changing needs and changing menus quickly and easily! The plate fits over a full size 12" x 20" pan opening and contains (6) 4 3/4" diameter holes, which are compatible with most 2.5 qt. round insets. It creates a clean look and professional appearance, while also preventing any spills and drips from getting into the well. It is made from type 201, 19 gauge stainless steel for easy cleanability and exceptional durability.

The welded clips help keep this adapter plate stationary in your steam table or food warmer, reducing the risk of accidental spills and maximizing warming or cooling efficiency. Choose additional adapter configurations to create a buffet setup that can easily change with the meal time and the menu, and give you greater flexibility. The adapter plate can easily be removed and stored for seasonal or daily menu changes.
