## Notes & Details

Cost-effective and versatile, this improved Avantco CO-38M countertop convection oven is great for supplemental baking, low-volume baking, and medium-volume reheating at coffee shops, kiosks, churches, and schools. Its full size cavity can handle up to (4) full size 18" x 26" sheet pans and has extra spacing between racks for taller food. Its compact design is great for small footprint and countertop needs with a recommended approximate usage of up to 4 hours per day, 5 days per week. Note: this unit is not intended for high-volume, high-temperature, or delicate baking requirements. Please see operation manual.

Powered by 3,500/4,600W, this single phase unit is equipped with two dial controls to adjust the temperature between 150 and 550 degrees Fahrenheit, along with a 120-minute audible timer to help you keep track of your culinary creations. Please note, the timer does not control cooking. Each dial is accompanied by an indicator light too, which alerts the user to when each function is in operation. As the oven produces heat, dual convection fans work to spread the heat evenly around the cavity to ensure efficient and thorough cooking or baking. This oven includes a master on/off switch, which allows the user to turn off the unit without changing the temperature dial control.

Because the window in the door is tempered dual-pane glass, it allows employees to easily keep an eye on food while it's cooking. The door's improved hinge design is built to last through thousands of openings and closings. This, along with the full border gasket, helps seal-in heat and reduce risk of injury. Plus, the door's full-length, cool-touch handle provides easy oven access. Inside, the oven features a set of 4 wire shelves, which are adjustable to best accommodate your ever-changing tasks. Shelves can even be added and removed to accommodate multiple sheet pans or a single roast pan.

Made with a stainless steel interior, the oven cavity won't corrode or rust, even with the accidental spill or leak. The exterior of the oven, also made of stainless steel, provides overall durability for coffee shops and kiosks. To abide by food safety guidelines, the unit is equipped with 4" stainless steel legs, which raise the oven off of the countertop surface below for improved airflow and easy cleaning. A 208/240V electrical connection is required for operation.
