Technical Data

Power Type	Manual
Style	Vertical
Type	Churro Stuffers

Notes & Details

Make delicious churros with this Avantco CS-20V 20 lb. stainless steel vertical manual churro stuffer with 3 non-hollow churro tubes and 1 hollow churro tube! This unit boasts a vertical design that delivers reliable performance while taking up minimal counter space. It includes 11/16", 7/8", and 15/16" non-hollow churro tubes and a hollow churro tube so that you have everything you need to get started without needing to buy any additional accessories. The three non-hollow tubes allow you to add varying sizes of delicious churros. The hollow churro tube is to be used in conjunction with one of the non-hollow churro tubes to create hollow churros of different sizes. The hollow churro tube will not work on its own.

The stuffer has enclosed steel gears that turn with two speed options so you can easily attach the handle to a fast- or slow-turning shaft, combining with a pressure relief valve to offer precise control over your product's consistency. The handle and gear design give you greater leverage while making your churros. The large all-metal drive gears and piston rod are made to deliver the pressure needed to give you ultimate control over the consistency of your churros thanks to the built-in pressure valve. The heavy-duty gasket completely seals the cylinder to prevent any dough or air leaks that would compromise the perfect churro.

Type 201 stainless steel sides and a removable type 304 stainless steel tilt out canister ensure long-lasting durability as well as quick and simple cleaning. This churro stuffer features large rubber feet and a heavy base to help prevent rocking during use. Get started making the soft, decadent churros that customers love with this churro stuffer!
