ETL, US & Canada

Technical Data

Color	Silver
Features	Sight Gauge
Material	Stainless Steel
Plug Type	NEMA 5-15P
Power Type	Electric
Style	Double Wall
Type	Coffee Urns

Notes & Details

Brew delicious, flavorful coffee day after day with the Avantco CU65ETL 65 cup coffee machine urn. Perfect for caterers, schools, churches, and offices, this easy-to-use coffee urn makes a large amount of coffee at one time so you can quickly serve a crowd. It is designed to keep coffee hot and fresh for hours - through your entire catering event or meal time.

This urn is made from durable 304 stainless steel, which offers superior corrosion resistance compared to other types of stainless steel. The exterior has a polished finish that makes it an attractive addition to any coffee station, and also makes it easy to clean!

Designed with safety in mind, this urn comes with a heavy-duty locking lid that prevents spills during movement, while cool-touch handles give you a place to grip the urn safely. The double-walled design also keeps the exterior at a comfortable temperature too, preventing accidental scalds or burns. Boil-dry and overheat protection features keep your urn from reaching unsafe temperatures and give you peace of mind that even during busy shifts you can count on it to operate within safe parameters.

Using the urn couldn't be easier. It comes with a sight glass so that you can easily tell when it's time to brew more coffee, and with its removable lid, brew basket, and stem, setting it up and cleaning the unit is a breeze. Additionally, it has a maximum fill line to help prevent overfilling and accidental overflows, while indicator lights let you know when the urn is "heating" and "ready". A simple on/off switch makes it easy to get brewing right away, and its dual-heater thermostat system will take care of the rest - brewing and holding coffee at ideal temperatures. It requires a 120V electrical connection and comes with a cord and plug. Brews approximately (1) 5 oz. cup per minute.
