Notes & Details

Expertly cook pancakes, burgers, eggs, grilled cheese, and all of your customers' favorites with this Avantco EG30N 30" electric countertop griddle. Each third of the 1/2" thick steel cooking surface is designed to heat evenly throughout and is controlled by a separate thermostat knob, which is adjustable from 150-570 degrees Fahrenheit. The center of each third is where it reaches its maximum temperatures, while the edges allow you to cook at lower temperatures or keep food warm for a short time. With overheat protection, power on / heating indicator lights, and 3" steel splashguards on the sides and back, this unit is as safe to use as it is powerful and effective.

Thanks to its 15 1/2" x 30" griddle plate, this unit is built for high-volume commercial use. The heavy duty stainless steel housing and 3 15/16" to 5 15/16" adjustable stainless steel feet provide durability, while the easy to remove grease tray allows for quick, hassle-free cleaning.

This Avantco electric griddle requires a 208V / 240V electrical connection for operation.

This model replaces the Avantco EG30 electric countertop griddle.
