## Notes & Details

Increasing sales of pre-made hot foods such as hot dogs, burritos, and sandwiches is easy with this Avantco HDC-13 self/full service countertop heated display warmer with hinged doors! With the ability to reach 120 degrees Fahrenheit in 10 minutes and its maximum temperature of 185 degrees Fahrenheit in 20 minutes or less, this merchandiser won't hold you back when hungry customers are flocking to your business. It offers precise thermostatic temperature controls to help you keep your hot foods at safe serving temperatures. The compact 13" wide footprint is perfect for establishments with less countertop space available able to keep food hot and ready for self-service by customers. The small footprint is also perfect for places looking to try a self-service or to-go food offering without committing to a larger unit right away.

Great for convenience stores, snack bars, concession stands, and more, this 13" display warmer has hinged front and rear tempered glass doors to encourage your customers to serve themselves and to allow your staff to refill the shelves from behind the counter. Its 3 tier stainless steel racks are removable for easy cleaning and provide 422 square inches of space to show off your most mouthwatering impulse buys. The rack is also adjustable and has 20 adjustment height options for you to choose from depending on the items you want to display.

This unit has a stainless steel body with an attractive black finish as well as tempered glass doors to protect against breakage. Its thermostatic temperature controls regulate the 850W of heat radiated by its bottom mounted heating element, while interior lighting provided by a lamp increases product visibility. The light is controlled separately from the heat for your convenience. This 3 shelf countertop merchandiser has a temperature range from 85-185 degrees Fahrenheit. This model comes with a removable water pan to help maintain ideal humidity inside the display case. It requires a 120V electrical connection.
