Notes & Details

Designed to keep all your freshly cooked food items hot until they're ready to serve, this Avantco HEAT-1836 full size non-insulated heated holding cabinet helps ensure your restaurant, diner, or bakery is always prepared for high volume meal periods. Boasting nine adjustable holding settings and a heat mode that can reach 185 degrees Fahrenheit, this cabinet is perfect for storing a wide variety of ready-to-serve dishes.

A total of 36 lip-load pan slides accept full size 18" x 26" sheet pans, while a Lexan clear door provides outstanding impact and heat-resistance as well as allowing for easy monitoring of the contents inside. For valuable temperature protection, the door is paired with both magnets and a tight-fitting gasket to ensure the warm air inside does not escape. You can also reverse the door hinges based on your needs. An easy-to-read thermometer for effortless temperature monitoring and a pair of dials is located on the unit's bottom control drawer that can also be removed for quick cleaning. Thanks to four 5" poly casters, this cabinet can be filled and moved from your prep location to the serving area with incredible ease, while integrated corner bumpers protect nearby walls and equipment during transport. The Avantco HEAT-1836 full size cabinet requires a 120V electrical connection.
