<b>Power Type</b>	Electric
<b>Sections</b>	1 Section
<b>Style</b>	Reach-In
<b>Type</b>	Holding / Proofing Cabinets

## Plan View

## Notes & Details

Proof dough and keep hot food hot with this Avantco insulated holding / proofing cabinet! This compact, versatile unit is great for keeping hot foods at the perfect temperature to serve at a moment's notice! With a proofing mode and adjustable humidity settings, you can also proof dough before it's ready to bake. In heat mode, this model operates between 80 and 185 degrees Fahrenheit; in proof mode, it operates between 85 and 115 degrees Fahrenheit at 30-100% humidity.

With humidity levels adjustable from 30% to 100% and 9 different temperature settings, you'll be able to accomplish the right results every time! A simple toggle switch lets you select between the "heat" and "proof" modes, while the vibrant LED temperature display on the removable bottom drawer makes it easy to keep an eye on things from across the room. A pair of dials is located on the unit's bottom control drawer that can also be removed for quick cleaning. The rugged aluminum interior contains removable fixed wire pan slides, allowing you to place up to 34 full size sheet pans on whichever level is convenient. To use the proofing mode, simply fill the pan with water, select the proofing mode, and then select your desired humidity level!

The 180 degree full-swing solid stainless steel dutch doors provide outstanding impact and heat resistance. Magnetic latches, heavy-duty insulation, plus a tight-fitting gasket keep the doors closed when they're supposed to be and keeps the hot air in! This cabinet has 5" poly casters with locks on the front wheels to keep it in place once you've rolled it right where you want it. Built-in corner bumpers protect your walls from scuffs and bumps while you're rolling from one area to another. An integrated cord wrap on the back will keep the power cord off the floor and out of the way while you roll the cabinet. You can also reverse the door hinges based on your needs. It has an output of 1,575W and requires a 120V electrical connection.
