Maximum Temperature	200 Degrees F
Output	5 Gallons Per Hour
PSI	10 - 58 PSI
Style	Automatic
Temperature Control	Fixed
Type	Hot Water Dispensers
Water Inlet Size	1/4 Inches

## Notes & Details

The Avantco HWDA2 2 gallon hot water dispenser is perfect for times when you need a lot of hot water quickly or are setting up a hot beverage bar. Whether you are filling insulated beverage dispensers or individual tea cups, use this dispenser to make sure you never run out of hot water. Since this model has a simple, basic control, you can set your unit up, and then it will make sure your water is hot and ready when you need it. It also comes with no assembly required for that out-of-the-box convenience.

This unit is great for holding a lot of water at a consistent temperature. The device can hold a maximum temperature of 200 degrees Fahrenheit. Its 2 gallon capacity ensures that there's enough hot water to go around!

Made for the commercial environment, this dispenser features a cup clearance of 10" so that you can easily fill tall mugs and servers. Simply pull down the lever to pour. There are three lights on the unit to indicate power, heating, and hold. It also features a removable drip tray that catches any stray drops or spills to keep your work area clean and safe.

This hot water dispenser is made of stainless steel for a strong, durable product that will last through many uses. With its shining finish, this unit will look professional on your countertop. The rear of the unit has an accessible drain plug, water hookup, and overflow port. A great choice for your restaurant or cafe, this dispenser requires a 120V, 1500W electrical connection.
