

## Avantco IC1800P Countertop Induction Range / Cooker with Probe - 120V, 1800W

Item #177IC1800P

### Technical Data

Width	13 1/2 Inches
Depth	16 1/2 Inches
Height	4 1/16 Inches
Cord Length	23 5/8 Inches
Cooking Surface Diameter	4 3/4 - 10 1/4 Inches
Recommended Pan Size (Bottom Diameter)	9 Inches
Amps	15 Amps
Phase	1 Phase
Voltage	120 Volts
Wattage	1800 Watts

### Features

- Multiple cooking modes from 120 - 450 degrees Fahrenheit
- Probe cooking feature cooks foods to a set temperature for improved control
- Automatically switches to standby mode when pan is removed
- Durable stainless steel body with 110 lb. suggested weight capacity
- No open flame makes this a safer alternative to conventional countertop ranges

### Certifications

## Technical Data

Color	Red Silver
Control Type	Digital
Features	Probe Included Timer
Installation Type	Countertop
Number of Burners	Single
Number of Power Levels	20
Plug Type	NEMA 5-20P
Power Type	Electric
Suggested Weight Capacity	110 lb.
Temperature Range	120 - 450 Degrees F
Type	Heaters Induction Ranges
Usage	Front of House

## Notes & Details

Convenience and safety meet next-generation technology and performance in the Avantco countertop induction range! This induction cooker is perfect for use in pasta stations, catering services, display cooking, or anywhere you need an extra burner, and it's safer than conventional countertop ranges. This unit includes a probe for probe core cooking, which allows you to cook or hold more delicate foods like stocks or sauces to a set temperature for improved control. As a result, it can prevent boil over, avoiding a mess or having to restart a dish. The power and the probe can be managed at once, and both will display on the screen at the same time.

This induction cooker is compatible with induction-ready pans that have a bottom diameter between 4 3/4" and 10 1/4". The cooker enters "standby" mode when the pan is removed from the surface. The induction range has a 180-minute timer, which allows you to set the cook time and do other tasks while you wait! A stainless steel frame gives this unit exceptional durability, while also making it easy to clean.

With its induction technology, this countertop range generates heat with no open flame. This means less ambient heat in your kitchen, fast heat-up times, and most importantly no open flame or flammable fuels that could be a potential safety hazard. This unit boasts 1800W of cooking power, and you can cook using either a wattage-based "power level" mode, or adjust the temperature directly from 120 - 450 degrees Fahrenheit in 5 degree increments. It requires 120V of electrical power for operation.
