- Durable polyethylene construction
- Smooth surface limits harmful bacterial growth
- For use with select Avantco steam tables

Notes & Details

The Avantco 177P4WPBRD 57" x 8" cutting board for select Avantco units is a direct replacement for the one that came with your Avantco steam table. Over time, cutting boards will wear down from constant beating, pounding, and knife damage. Replace a worn out cutting board so that you can continue prepping, chopping, and staging your ingredients.

This 1/2" thick cutting board is 8" deep, giving you plenty of workspace. The polyethylene construction stands up to everyday use in a commercial kitchen, while the smooth, durable surface is easy to clean and inhibits the growth of bacteria. For convenience, this cutting board comes pre-drilled.
