Certifications

Technical Data

Features	Non-Stick Rear Control With Sneeze Guard
Plug Type	NEMA 5-15P
Power Type	Electric
Top Style	Slanted
Type	Hot Dog Rollers with Bun Holder

Notes & Details

As an all-American food, hot dogs are a classic addition to fast casual menus nationwide. To help you start serving juicy hot dogs at your concession stand or convenience store, Avantco offers a convenient 3 piece station, which includes a roller grill, sneeze guard, and bun cabinet. Together, this station gives you the means of cooking hot dogs, a way to keep them safe and free from contamination, and a place to store plenty of buns nearby for fast service.

The roller grill features 11 non-stick rollers and can fit up to 30 hot dogs simultaneously, making it great for low to moderate volume operations. The grill's slanted design even shows off all of your products at once to entice your guests. Besides hot dogs, the grill is also well suited to cook up egg rolls, sausages, and even taquitos. Whatever you're cooking, the continually rotating rollers will ensure that it's evenly cooked from all sides. Plus, two temperature control knobs let you adjust the front and rear rollers independently for energy efficiency. This also allows you to use one roller zone for cooking and the other for holding. For minimal maintenance, non-stick seals prevent grease from entering the base of the grill and contacting the motor and drive chain. The drip tray is removable as well, and since the grill is made from heavy-duty stainless steel with non-skid feet, it's easy to clean at the end of each day.

To set up the hot dog station for maximum space-efficiency, place the roller grill on top of the bun cabinet. This stainless steel cabinet can hold up to 100 hot dog buns at a time, capable of getting staff through busy periods with minimal restocking. Simply cook the meat on the grill, retrieve a bun from the cabinet below, and serve! Since the station comes with a clear acrylic sneeze guard, it even prevents food from becoming contaminated as it cooks.

Easy to use, durable, and designed for efficient workflow, this set of hot dog equipment is the perfect way to add hot dogs to the menu. The grill requires a 120V electrical connection for operation.
