Notes & Details

Outfit your restaurant or catering service with this Avantco S30CP 11 qt. copper soup kettle warmer to satisfy your hungry customers and make serving a breeze! This convenient kettle features 400 watts of heating power to ensure your signature recipes remain at safe temperatures from 100-212 degrees Fahrenheit and stay ready to serve for longer, minimizing wait times to ensure a positive customer experience. Coming with an easy-to-control thermostatic control dial, this product is perfectly suited to hold a variety of menu items such as soups, stews, gravies, and cheese sauces to help save time on prep in your bustling kitchen and minimize customer wait times. With a sleek copper exterior, this countertop kettle blends easily with many decorative styles and helps to create a professional and clean appearance in your food service establishment. Plus, this product comes with two sets of soup labels to make serving quick and easy! The durable stainless steel construction also enables this product strong enough to handle daily wear and tear, transport, and allows it to be a breeze to clean!

Equipped with a durable, hinged lid, this food kettle is specifically designed to prevent contamination and even helps conserve energy! It also features a notched lid so you can store your ladle inside without taking up any precious counter space, guaranteeing a mess-free, quick-service experience for your patrons. Created with high-volume usage in mind, safety for your customers and your employees are one of the most important factors to consider! Equipped with a cool-touch handle, this product promotes safe handling and prevents the risks of burns, spills, and other dangerous accidents from occurring in your establishment. Featuring a large holding capacity, the 11 qt. insert allows you to stock up on your most popular soups or sauces, making it an excellent addition to any restaurant, catering service, or buffet line. Plus, the stainless steel inset and interior lining are removable and dishwasher safe for easy clean up! This warmer requires a 120V electrical connection.
