## Avantco 177SSVMOTOR Sausage Stuffer Motor for 20 lb. & 30 lb. Models - 120V, 30W

Item #177SSVMOTOR

### Technical Data

Length	12 3/16 Inches
Width	11 7/16 Inches
Height	7 7/8 Inches
Plug Type	NEMA 5-15P
Type	Motors

### Features

- Electric operation allows for reduced fatigue and increased output
- Variable speed control increases versatility
- Foot pedal promotes hands-free operation which allows both hands to be used to stuff sausage casings
- Automatically reverses at bottom of canister
- Designed for use with Avantco SS-20V and SS-30V sausage stuffers; 120V

### Certifications

## Notes & Details

This Avantco 177SSVMOTOR sausage stuffer motor for 20 lb. & 30 lb. models increases efficiency and saves your staff time and labor. With variable speed control, you can adjust the settings based on the texture and thickness of your sausage mixture. The motor controls the direction of the sausage and automatically reverses when it hits the bottom of the 20 or 30 lb. sausage stuffer (sold separately). This eliminates all work associated with turning the handle manually, ensuring all employees can operate the unit with little to no exertion.

The motor also includes a foot pedal with a 6 1/2' cord for convenience, allowing the operator to instead focus on forming the sausage with their hands, eliminating the need to manually operate the unit. The hands-free design promotes sanitation, which is especially important in a kitchen that works with raw meats. This unit requires a 120V electrical connection for operation.
