Installation Type	Countertop
Plug Type	NEMA 5-20P
Power Type	Electric
Slices (per Hour)	600 Slices
Style	Horizontal
Type	Conveyor Toasters
Usage	High Volume

Notes & Details

Let the irresistible aroma of warm, golden brown, toasted bread and bagels tempt customers at your cafe, coffee shop, hotel, or breakfast buffet with the Avantco T1402S double-stacked conveyor toaster! This conveyor toaster set features a pair of T140 conveyor toasters stacked vertically to minimize counter space and maximize production, and since it can toast up to 600 slices of bread or bagel halves per hour, you can be sure it is ready to keep up with demand. Each toaster has a 10" wide conveyor belt and 3" slot to accommodate large quantities of your most popular foods, and you can set the speed and heat controls separately for the top and bottom units. This gives you added flexibility too - you can use both units to pump out high volumes of the same product, or use each to make a different baked good!

For versatility, each toaster can dispense product from the front or back on the included chutes. Its stainless steel exterior provides long-lasting durability, while a pull-out crumb tray design makes it easy to clean. And thanks to its energy-saving standby mode, you can conserve power when this toaster isn't in use. Each toaster requires its own 120V electrical connection for operation.
