Type	Strip Warmers
Usage	Light Duty Medium Duty

Notes & Details

Keep your prepared foods hot and ready to serve with the Avantco 36" strip warmer with toggle controls! This strip warmer uses a durable metal sheathed element to provide 850 watts of heating power, hot enough to maintain peak serving temperatures but gentle enough to prevent drying or overcooking. It's perfect for use in your cafeteria, restaurant, banquet hall, buffet line, or anywhere that you need to keep prepared foods piping hot and fresh for your customers.

The warmer's medium-duty stainless steel housing provides excellent durability and corrosion resistance, making it ideal for a busy kitchen environment. Side-mounted toggle controls are simple to operate and provide one level of heat, so you can be sure your staff does not overheat your foods. For your convenience, mounting brackets are included to make installation as easy as possible. This unit must be hardwired and requires a 120V electrical connection for operation.
