Avantco Ice 19499825 Expansion Valve for MC-500 Series Ice Machines

Item #19499825

Technical Data

Type	Valve Parts
------	-------------

Avantco Ice Machines

Features

- Direct replacement for original part
- For use with MC-500 series ice machines

Notes & Details

This Avantco Ice 19499825 expansion valve is a perfect replacement for the one that came standard on MC-500 series modular ice machines. A damaged valve can prevent your unit from operating to specification, which in turn may lead to premature failure in other refrigeration system components. Be sure to inspect the valve regularly and replace if needed.
