Certifications

Made in America

Technical Data

Style	For Single Shelf
Type	Bottle Organizers Spring Fed Organizers

Notes & Details

This Avantco 7 lane bottle organizer is the easy way to turn standard cooler shelves into organized merchandising space that looks great and is easy to restock! Each lane of this organizer kit is designed to hold 12 - 16 oz. cans and 12 - 20 oz. bottles, for a total capacity of 42 beverages per shelf. And since it features a spring-fed pusher design, it will automatically feed the next beverage in the lane to the front as stock is removed. This design also makes it easy to see at a glance when you're low on or out of a particular beverage and refill it.

It attaches to the back wire of your shelf, which eliminates the need for the cable ties other competitor products require for installation. An attractive scooped front ring design holds beverages in place while still offering a clear view of the labeling, too. Use it to clean up cluttered merchandiser shelving and keep track of your stock with ease!
