Notes & Details

Whether you operate a pub, banquet hall, catering service, or facilitate other special events, this Avantco UDD-1-HC-S beer dispenser is an excellent way to offer crisp, refreshing draft beer to your guests without investing in a complex built-in tap system! This unit features a single tap tower with a 10 1/4" faucet height that allows you to easily fill pint glasses and pitchers with local microbrews, international macrobrews, and everything in between. Its compact construction holds a 1/2 keg of beer that is concealed behind a self-closing door that not only prevents potential energy loss, but also locks to prevent theft during off hours.

Unlike many competitive beer dispensers, this model ships with a coupler so that you can tap a keg right out of the box! This commercial kegerator features a sleek stainless steel finish and a 1 1/2" thick stainless steel top that is both durable and extremely simple to clean, while a built-in drip tray further expedites end-of-day cleaning. It has a 3/7 hp refrigeration system that circulates R290 hydrocarbon refrigerant. R290 refrigerant has an ozone depletion potential (ODP) of 0 and a global warming potential (GWP) of 3, making it an energy-efficient choice for your business. This unit requires a 115V electrical connection for operation and even comes with adjustable feet for simple, convenient leveling. For long-lasting quality assurance and peace of mind, this unit also comes with a 2 year Parts and Labor Warranty.
