Notes & Details

Whether you operate a pub, banquet hall, catering service, or facilitate other special events, this Avantco UDD-2-CT-S stainless steel beer dispenser is an excellent way to offer crisp, refreshing draft beer to your guests without investing in a complex built-in tap system! This unit features double tap towers with a 10 1/4" faucet height that allows you to easily fill pint glasses and pitchers with local microbrews, international macrobrews, and everything in between. It also features a club top, which provides an extra storage compartment for chilling approximately 15-18 additional beer bottles or other single-serve bottles. Or use this compartment to store garnishes to keep them close and fresh!

This dispenser holds (2) 1/2 kegs so you can stock up on one brew or offer customers a selection to choose from. It even comes with 3 shelves for optional bottle or can storage while concealing the product behind 2 solid doors. This unit features self-closing doors, ensuring that temperature is maintained and all your beverages are secure when not attended to. The doors themselves are not only self-closing to prevent potential energy loss, but also lock to prevent theft during off hours. This unit is equipped with knockout plugs to install external CO2 lines.

Unlike many competitive beer dispensers, this model ships with "D" system couplers so that you can tap kegs right out of the box! This commercial kegerator features a stainless steel exterior and a 304 type stainless steel interior that is both durable and easy to clean, while a built-in drip tray further expedites end-of-day cleaning. It has a 1/3 hp refrigeration system that circulates R-290 hydrocarbon refrigerant. R-290 refrigerant has an ozone depletion potential (ODP) of 0 and a global warming potential (GWP) of 3. A 115V electrical connection is required for operation.
