Notes & Details

Whether you operate a pub, banquet hall, catering service, or facilitate other special events, this Avantco stainless steel beer dispenser is an excellent way to offer crisp, refreshing draft beer to your guests without investing in a complex built-in tap system! This unit features 2 quadruple tap towers with a 11" faucet height that allows you to easily fill pint glasses and pitchers with local microbrews, international macrobrews, and everything in between. Each tower is made from stainless steel with a polished chrome finish and is air-cooled to keep all your beers chilled to perfection. Plus, each tower comes with 4 hoses to get the beer flowing right away. As an added bonus, 2 double tap towers are also included, which allow you to switch the tower configuration as your needs change!

The dispenser cabinet holds (4) 1/2 kegs so you can stock up on one brew or offer customers a selection to choose from, and it even comes with 4 shelves for optional bottle or can storage. The doors themselves are not only self-closing to prevent potential energy loss, but also lock to prevent theft during off hours.

Unlike many competitive beer dispensers, this model ships with "D" system couplers so that you can tap kegs right out of the box! Built into each coupler, an integrated pressure relief valve provides you with added safety and peace of mind by ensuring the gas flow is cut off if the pressure gets too high.

This commercial kegerator features a sleek stainless steel finish and a 1 1/2" thick stainless steel top that is both durable and extremely simple to clean, while a built-in drip tray further expedites end-of-day cleaning. It has a 1/2 hp refrigeration system that circulates R290 hydrocarbon refrigerant. R290 refrigerant has an ozone depletion potential (ODP) of 0 and a global warming potential (GWP) of 3, making it an energy-efficient choice for your business. A 115V electrical connection is required for operation.
