Display Case Type	Refrigerated
Features	Adjustable Shelves LED Lighting
Horsepower	1/2 hp
Installation Type	Freestanding
Interior Color	White
Number of Shelves	3 Shelves
Refrigerant Capacity	5.2 oz.
Refrigerant Type	R-290
Refrigeration Type	Forced Air
Sections	1 Section
Style	Vertical
Temperature Range	33 - 40 Degrees F
Type	Merchandisers

## Plan View

## Notes & Details

Display your grab-and-go items in style while keeping them chilled with this Avantco WMAC-36HC 36" white vertical air curtain merchandiser. Perfect for convenience stores, grocery marts, cafes, and other operations, this merchandiser refrigerator is designed to display! Whether you are selling cold, bottled drinks or pre-packaged grab-and-go snacks, this merchandiser gives you the opportunity to let your products sell themselves.

This merchandiser features bright, cool LED lighting to show off your products at their best to draw attention. For outstanding durability, this cool white air curtain merchandiser is made of painted steel, and the double tempered glass sides are also durable while allowing for increased visibility to make for a more attractive presentation. In addition to the bottom shelf, it comes with 3 adjustable coated steel shelves so you can organize and load your air curtain merchandiser with confidence. Since the shelves are adjustable, you can be sure that they'll accommodate changing merchandise and menus. To help save energy during off hours, this model comes with a night cover.

This unit operates using R-290, a specialized refrigerant that has an ozone depletion potential (ODP) of 0 and a global warming potential (GWP) of 3. This merchandiser contains a perforated back panel to ensure that air moves freely throughout the unit, keeping food and drinks cool. With increased ventilation, this unit uses less energy than comparable models. Also, the perforated back panel prevents the user from blocking airflow if the merchandiser becomes overfilled.

This air curtain merchandiser has digital controls with a temperature range of 33-40 degrees Fahrenheit. These controls make it easy to keep an eye on the interior temperature and are conveniently located on the bottom front of the machine for easy access. This unit has an automatic hot gas defrost feature, so your staff won't need to set aside valuable time to schedule a defrost. When it comes time for cleaning or maintenance, simply roll the unit away from the wall using the casters that add convenient mobility to the merchandiser. This unit requires a 115V electrical connection for operation.
