| Temperature Range | -15 - 15 Degrees F |
| Type | Gelato Cabinets |

Notes & Details

Display, merchandise, and serve a delicious variety of gelato flavors with this Avantco curved glass gelato dipping cabinet! Featuring a racking system designed to fit the included (13) 5 liter pans, this unit is perfect for ice cream shops, candy stores, dessert bars, and cafeterias. It's capable of serving ice cream, gelato, sorbet, and acai. The frozen storage space beneath the display even provides a convenient place for holding back-up pans, making it a space-efficient unit for businesses with limited space.

Outfitted with a curved-front sneeze guard, the dipping cabinet is perfect for front-of-house applications. Not only does the sneeze guard prevent customers from contaminating the product, but it ensures crystal-clear visibility for merchandising purposes. By showcasing bright and fruity or dark and decadent chocolatey flavors behind the glass, you tempt customers into trying a bite!

A sliding cover protects your product while helping to retain cold air around the product for a safe holding environment. Because it slides open and closed, it's fast and easy to use, too, which is perfect for those busy rush hours or constant streams of customers in the summer months! The cover also comes equipped with a lid lock to ensure that your product remains protected and temperature controlled. This dipping cabinet features a white, curved front design with a painted steel construction. Plus, it has LED lighting to help light and show off your products!

Featuring a digital controller to maintain temperatures from -15 to 15 degrees Fahrenheit, this cabinet ensures that your gelato is held in a proper environment to preserve its quality and consistency. To help achieve this, the robust, bottom-mounted compressor uses R-290 refrigerant. This specialized refrigerant has an ozone depletion potential (ODP) of 0 and a global warming potential (GWP) of 3. Plus, for maximum structural rigidity and temperature retention, the cabinet is foamed in place using cyclopentane insulation. It comes with custom vinyl and requires a 115V electrical connection for operation.
