Refrigerant Type	R-600a
Temperature Range	33 - 40 Degrees F
Type	Countertop Refrigerators

Notes & Details

Great for showing off bottled beverages and prepackaged snacks or sandwiches, this Avantco SC-80 2.7 cu. ft. countertop merchandiser refrigerator allows you to offer a selection of impulse items without investing in a full-size merchandiser. Its compact countertop design makes this unit great for use in applications like markets, delis, and restaurants where it can be kept in plain sight to house take-out beverages or give customers a chance to see all of the delicious sides and drinks you offer with your meals!

This model comes with all of the things you would expect to find in a larger unit, including a lighted 17 3/8" x 7 1/8" area to put your own custom graphics, and interior lighting to illuminate your products.

Its single glass door even allows customers to see the contents of your merchandiser at a glance, and since the door is self-closing, you never have to worry about staff or customers accidentally leaving it open. Plus, a built-in lock helps prevent theft.

The 2.7 cu. ft. interior on this unit is the perfect size for offering a small selection of bottled beverages and prepackaged snacks. It comes with 4 shelves, which can be adjusted to meet the needs of changing inventory.

This merchandiser also boasts a rust-proof black exterior to provide a sleek look, while foamed-in-place polyurethane cell insulation helps maintain interior temperatures. To aid in temperature retention, the door is insulated.

To help ensure that the merchandiser maintains temperatures between 33 and 40 degrees Fahrenheit, it features a top-mounted 1/10 hp refrigeration system that circulates R-600a refrigerant. A fan within the cabinet circulates the air for even distribution. The unit requires a 115V electrical connection for operation.
