Cooking Surface Diameter	19 Inches
Features	Wind Guard
Material	Steel
Number of Burners	1 Burner
Power Type	Liquid Propane
Total BTU	210000 BTU
Type	Stoves

Features

- Features precision heat control
- Large, stable 19" cooking surface
- Durable, welded steel frame
- Includes a powerful 210,000 BTU burner
- Accommodates larger, heavier stock pots

Certifications

Portable LP Tank Connection

Notes & Details

Thanks to its heavy-duty construction and powerful 210,000 BTU 10" burner, this Backyard Pro outdoor range / patio stove with hose guard can handle larger, heavier stock pots than traditional outdoor range designs. Whether you're deep frying a turkey, steaming clams or vegetables, preparing delicious corn-on-the-cob, or jambalaya and stews, this heavy-duty patio stove has the durability and power to get the job done!

With nearly double the output of a standard duty outdoor range, this model can boil water or heat up oil even faster, and its precision adjustable 10 PSI liquid propane regulator with 36" rubber hose enables greater control over the flame for flexibility.

Its large, sturdy top can accommodate stockpots or pans up to 17" in diameter. For safety, the overall height of this heavy-duty outdoor patio range is just 9 3/4", and it utilizes a double leg design and welded steel frame with a built-in hose guard for added stability and safety.
