Features

- 16" x 16" cooking surface
- 110,000 BTU liquid propane burner
- Durable, welded steel frame with adjustable height
- Easy-to-attach hose ensures a secure connection
- Features adjustable, regulated heat

Certifications

Portable LP Tank Connection

Notes & Details

This Backyard Pro square single burner outdoor patio stove / range provides exceptional cooking performance in a simple, square design. Built to support large stockpots, cast iron skillets, and other cookware, this stove is great for deep frying turkeys, frying fish, steaming clams, and boiling vegetables. An ideal choice for caterer events and summer picnics, this stove provides endless possibilities!

To withstand outdoor use, the 4 legs provide the necessary balance for placement on patios and other hard surfaces for an even, stable cooking platform. Plus, its simple, low-to-the-ground design makes it great for accommodating larger stockpots without worrying about tipping and spilling. For added flexibility, the stove even adjusts in height, bringing the cooking surface up to 30" off of the ground.

With 110,000 BTUs of cooking power, the stove provides ample heat for even, efficient cooking, no matter what's in the pot! The 5 PSI adjustable high performance liquid propane regulator and 36" rubber hose allow the operator to easily control the flame, too. A secure, hose-to-burner connection is essential when working with liquid propane tanks and gas cooking equipment. To prevent leaks, the included hose is easily inserted into the burner for a safe and reliable fit.
