- Perfect size for making sausage links or rope
- Odorless, flavorless, and uniform in size
- Ready to use; no prep required
- Includes 10 packs of 3 casings; makes up to 550 lb. of sausage total.

Certifications

Made in America

Notes & Details

Use Backyard Pro Butcher Series 32 mm collagen sausage casings to make processed, smoked, pre-cooked, semi-dried, or dried sausage. Made of edible beef collagen, this processed casing is the convenient and ready-to-use alternative to natural casings. There's no soaking, rinsing, or prep required for convenient and easy use. For consistency, these casings are uniform in size. Their 32 mm size is perfect for making mid-size bratwurst, hot dogs, italian sausage, and kielbasa!

Try pig or cow leg, rib, or flank meat for a traditional flavor, or boar, deer, or even alligator meat for a surprising new take on your signature sausages. This collagen sausage casing is odorless and flavorless to preserve the unique, authentic flavor of the meat within. Its thick walls offer added strength to resist breaking, which is especially helpful when it's hung in smokers or dried in dehydrators. Despite the casing's thick walls, smoke is still able to permeate the meat and enhance the flavors of the sausage inside.

Great for hunters, butcher shops, and meat departments, these come in 3 casings per pack for convenient use and easy storage. Whether you're grilling, smoking, or dehydrating meats, it will help save prep time! This each pack of casings makes up to 55 lb. of sausage.
