Type	Sausage Casings
Yield	30 lb.

### Features

- Edible, processed casings from beef collagen
- Perfect size for making snack sticks or small breakfast links
- Odorless, flavorless, and uniform in size
- Ready to use; no prep required
- Each case includes 3 strands of casings

### Certifications

Made in America

## Notes & Details

Use Backyard Pro Butcher Series 19 mm mahogany collagen sausage casings to make processed, smoked, pre-cooked, semi-dried, or dried sausage. Made of edible beef collagen, this processed casing is the convenient and ready-to-use alternative to natural casings. There's no soaking, rinsing, or prep required for convenient and easy use. For consistency, these casings are uniform in size. The casing's 19 mm size is perfect for making snack sticks with a traditional dark exterior!

Try pig or cow leg, rib, or flank meat for a traditional flavor, or boar, deer, or even alligator meat for a surprising new take on your signature sausages. This collagen sausage casing is odorless and flavorless to preserve the unique, authentic flavor of the meat within. Its thick walls offer added strength to resist breaking, which is especially helpful when it's hung in smokers or dried in dehydrators. Despite the casing's thick walls, smoke is still able to permeate the meat and enhance the flavors of the sausage inside.

Great for hunters, butcher shops, and meat departments, each pack includes 3 strands of casings for convenient use and easy storage. Whether you're grilling, smoking, or dehydrating meats, it will help save prep time! This casing makes up to 30 lb. of sausage.
