- Wall offers clean, defined presentation at trade shows and outdoor events
- Easy-to-use canopy sets up quickly to save time and labor during event preparation
- Top is waterproof, flame-retardant, and filters out harmful UV rays
- Lightweight aluminum frame is durable and corrosion-resistant

Notes & Details

Bring the comfort and professionalism of Backyard Pro's AL Series 10' x 10' red canopy and wall kit to your next event. This straight legged canopy offers premium durability and coverage with a lightweight, portable design making it easy to work your next event in style! The brightly colored canopy is an easy way to draw attention at trade shows or provide shade and shelter during outdoor events.

The included 10' x 10' wall provides additional protection during events and clearly defines your space to minimize distractions. The white wall is a clean, clear space guaranteed to prevent distraction and offer contrast with your display for added sophistication.

The canopy's aluminum frame and eye-catching red canopy top combine to ensure optimum visibility, near or far. It features a rising truss ceiling system that combines the benefits of the full truss system's strength with reinforced truss bars, offering additional headroom similar to a cathedral-style frame. The aluminum frame is lightweight allowing for easy transport and as strong as comparable steel frames. It's perfect for outdoor events, providing up to 100 sq. ft. of shade beneath the 10' x 10' canopy. It is coated with 300D polyester with color fastness. It is also fire retardant and meets CPAI-84 certifications. Plus, the 4-legged design ensures stability and safety for staff and guests alike.

This canopy is flame-retardant and has a UV resistant coating to block out harmful UV rays. The fabric is also waterproof, providing shelter for your guests, equipment, and employees in the event of inclement weather. This top fits snugly over the frame for a seamless look and easy set-up.

This canopy is so simple to set up, it only takes a few minutes with the work of two employees to complete! Set the frame on its feet. Begin pulling the legs out while still keeping the top of the frame at an easily reachable level. Once the frame is partly expanded, add the cover on top with each corner fitting over a leg. Continue to pull the legs in opposite directions until they're out as far as they will go and lock into place. Finally, raise the height of each leg by lifting the upper portion, stopping when each leg locks into place. Tear down is just as easy. Remove the top, adjust the legs back to their lowest height, disengage each corner's locking button, and gently push together until the frame is once again folded fully. A roller bag is included to ensure that you have an easy way to store and transport the canopy frame, and a stake and rope kit provides a means of securing the canopy to the ground without worry.

Kit Includes:

- Aluminum frame
- Fabric top
- 1 Side wall
- Roller bag
- Stake kit
