- Top is waterproof, flame-retardant, and filters out harmful UV rays
- Steel frame features a powder-coated finish

Notes & Details

Easily tackle your next event with the Backyard Pro Courtyard Series 10' x 10' white straight leg steel instant canopy deluxe kit with 4 side walls. Supplying commercial grade durability and coverage with a lightweight, portable design, this item is just what your business needs to make the perfect impression! It comes with a powder-coated steel frame and a bright white canopy that combine to ensure optimal longevity and visibility, both near and far. The canopy also features a rising truss ceiling system that offers the benefits of the full system's strength with the added reinforcement of bars, supplying additional headroom similar to a cathedral-style setup. Plus, the kit's 4-legged design ensures maximum stability no matter the setting! For convenient transport to and from locations, a roller bag is even included with this product.

Ideal for outdoor events, such as wedding receptions, family reunions, or BBQ lunches, this item provides up to 100 sq. ft. of shade beneath its 10' x 10' canopy. The canopy is also constructed of waterproof fabric to shelter your guests, employees, and equipment from rain. It's even flame-retardant and features a UV-resistant coating to guard against harmful UV rays. Additionally, the four included 10' x 10' walls supply extra protection during events and clearly define your space to minimize distractions. The white walls help to create a clean, professional space as well, which is sure to offset your displays!

With a top that fits snugly over the frame, this kit offers a seamless look and easy setup. It only takes a few minutes with the work of two employees to complete! Simply place the frame on its feet, and then begin pulling the legs out while still keeping the top of the frame at a reachable level. Once the frame is partly expanded, add the cover on top with each corner fitting over a leg. Continue to pull the legs in opposite directions until they're out as far as they will go and lock into place. Finally, raise the height of each leg by lifting the upper portion, stopping when each leg locks into place. Tear down is just as easy. All you need to do is remove the top, adjust the legs back to their lowest height, disengage each corner's locking button, and gently push together until the frame is once again folded fully.

Kit Includes:

- Steel frame
- Fabric top
- 4 Side walls
- Roller bag
- Stake and rope kit
