Portable LP Tank Connection

Notes & Details

Increase your profits by extending your patio seating season or warming up outdoor events with this Backyard Pro HPSQRBZ bronze portable propane outdoor patio heater with a glass flame tube! This patio heater is great for your deck, patio, poolside bar, or outdoor event. With its square design and glass flame tube, this patio heater provides both physical warmth and a glowing, flickering ambiance to your outdoor seating area or event space.

This freestanding patio heater can be easily moved from place to place as needed, or moved into storage during the off season or to protect it from bad weather. Since it is powered by a portable liquid propane tank (sold separately), it is not tethered to an electrical power cord or a gas line so you can use it in just about any outdoor application.

By using a patio heater in your business, you can extend your outdoor seating season by several weeks! And when you have that extra seating capacity, you can increase the amount of revenue your restaurant takes in over the course of the year.

Made of durable powder-coated steel with a stainless steel burner assembly, this patio heater is designed to stand up to frequent transportation and use outdoors at your restaurant or catered events. When you simply need a little extra warmth and a stylish accent piece, this patio heater is a great choice. Plus, it can warm an area 10' in diameter. This model requires a liquid propane connection for operation and has an output of 40,000 BTU.
