- Steel frame features a powder-coated finish

Technical Data

Shape	Square
Style	Straight Leg
Type	Canopies

Notes & Details

Easily tackle your next event with this Backyard Pro Courtyard Series 10' x 10' blue straight leg steel instant pop up canopy tent. Supplying commercial-grade durability and coverage with a light weight, portable design, this item is just what your business needs to make the perfect impression! It comes with a powder-coated steel frame and a bright blue canopy that combine to ensure optimal longevity and visibility, both near and far. The canopy also features a rising truss ceiling system that offers the benefits of the full system's strength with the added reinforcement of bars, supplying additional headroom similar to a cathedral-style setup. Plus, the 4-legged design ensures maximum stability no matter the setting! For convenient transport to and from locations, a carrying bag is even included with this product.

Ideal for outdoor events, such as wedding receptions, family reunions, or BBQ lunches, this item provides up to 100 sq. ft. of shade beneath its 10' x 10' canopy. Crafted from water-resistant 100% polyester fabric, this canopy offers protection for your guests, equipment, and employees during light to moderate rain. It even features a UV-resistant coating to guard against harmful UV rays.

With a top that fits snugly over the frame, this canopy offers a seamless look and easy setup. It only takes a few minutes with the work of two employees to complete! Simply place the frame on its feet, and then begin pulling the legs out while still keeping the top of the frame at a reachable level. Once the frame is partly expanded, add the cover on top with each corner fitting over a leg. Continue to pull the legs in opposite directions until they're out as far as they will go and lock into place. Finally, raise the height of each leg by lifting the upper portion, stopping when each leg locks into place. Tear down is just as easy. All you need to do is remove the top, adjust the legs back to their lowest height, disengage each corner's locking button, and gently push together until the frame is once again folded fully.
