

PICTURED ABOVE The Bon Chef Four Sided SneezeGuard can protect both hot and cold food presentations. Can be installed over steam tables, induction cooking, refrigerated and ice wells. Food is served by an F&B team member wearing disposable gloves, serving portion-controlled amounts as recommended.

SUGGESTIONS Have your servers encourage extra helpings by asking the customer if they would like more to satisfy the customer who enjoys unlimited portions. Their second service portions will be hot and fresh!

BON CHEF INTRODUCES THE NEW FOUR-SIDED CLEAR VIEW ACRYLIC SNEEZE GUARD

Bon Chef's Four-sided Buffet SneezeGuard will give diners the assurance of germ containment and non-transference after this pandemic. The Four-sided Buffet SneezeGuard has complete protection with front, two-sided, and top guard - only the service area remains open. Your customers will feel protected and confident that no bacteria, germs, or virus is being transmitted by hundreds of patrons using the buffet and touching exposed areas. Keep the appeal and the great love of the buffet, while keeping it safe.
