

BON CHEF SMART BOWLS

NEW

Bon Chef proudly introduces its smart bowl series.

Bon Chefs new patent pending smart bowls rest on our smart bowl adapter bars. Bon Chef's smart bowl system was designed for the food to take the show and not the vessels.

With the Smart bowl system you don't have to have the usual undershelf to hold the bowls. Bon Chefs smart bowls suspend from the specially designed smart bowl adapter bars resulting in more food display.

Even the 6 inch salad dressing containers are now totally in the cold zone and are suspended from the adapter bars. See reverse side for descriptions and sizes.

When ordering please indicate NSF-7 well manufacturer & model number. The smart bowl system is adaptable to any manufacturer. Non NSF-7 Mechanical Wells require custom measurements & fillers to work with the Smart Bowl System.

9547V-1	VOLLRATH	36400 SERIES	1 Well

Note: All Vollrath wells require Smart Bowl - 9554 – 5.25" Shotgun Bowl

Notice:

The Bon Chef Smart Bowl System was specifically designed to fit all NSF-7 mechanical cold well manufacturers including standard and custom pan wells using our specialized support bars without the use of an undershelf.

In order to maintain a NSF food temperature of 41°F, the smart bowls system should be used on a NSF-7 Mechanical Cold Well. All Smart Bowls must be chilled with prepared food overnight before setting up the cold display in order to maintain 41°F.

The Smart Bowl System can be used with Non NSF-7 Wells and many times the proper temperature can be achieved, however, Bon Chef makes no claim on maintaining food temperatures for Non NSF-7 wells.

When ordering please indicate NSF-7 well manufacturer & model number. The smart bowl system is adaptable to any manufacturer. Non NSF-7 Mechanical Wells require custom measurements & fillers to work with the Smart Bowl System
