Output	120 Cones Per Hour
Plug Type	NEMA 5-15P
Type	Cotton Candy Machines

Notes & Details

Quickly and effortlessly spin an American classic with this Carnival King CCM28 cotton candy machine! With a steady production rate of two cones per minute, this machine makes it easy for you to keep up with demand and add more sales to your daily business! The CCM28's durable and reliable belt-driven operation delivers 1080W of power to boost all-day-long production and it includes two replacement belts to keep on hand for quick replacements.

This cotton candy machine features a large 28" diameter stainless steel bowl and stainless steel supply drawer to stand up to rigorous everyday use. This Carnival King CCM28 comes with clamps that hold down the bowl during use to minimize vibration, making operation smoother and less noisy!

Since this machine comes with a floss bubble, you can keep your cotton candy clean and contained within the unit but still visible to customers and ready to serve. This component features a cut-out section so you can easily access the cotton candy and quickly serve up your colorful creation to eager customers! Great for merchandising but light and easy to transport, the floss bubble sits loosely atop the rim of the machine so precautions may be needed when the unit is used outside in windy conditions.

Using this cotton candy machine couldn't be easier! The spinner head is 5" in diameter and holds 4 oz. of floss sugar. This cotton candy machine requires a 110V electrical connection.
