Type	Hot Beverage / Hot Topping Dispenser

## Notes & Details

Easily dispense cheese for nachos and other popular dishes with the Carnival King CD450 dual peristaltic cheese sauce and chili dispenser! This sauce dispenser features 450W (225W per cabinet) of heating power to keep cheese sauce at the ideal temperature for tasty nachos, and its side temperature indicator clearly displays the temperature of the interior between 140 to 155 degrees Fahrenheit. For optimal product viscosity, it's recommended to preheat unopened product to at least 140F. Featuring an attractive and durable stainless steel cabinet, this dispenser will blend in with any decor for long-lasting use.

This model works with 110 oz. cheese and chili sauce bags, giving you the ability to feature two sauces at once! An interior top shelf holds two extra bags so you have additional bags on hand and ready to go when your two bags in the dispenser run out. Each side of this dispenser has two buttons to allow greater control over portions. Using the orange button provides a single 2 oz. portion to help keep your costs under control, but when you need a larger portion for a special request, your staff can use the yellow button to manually dispense any amount. The orange button dispense time is customizable to dispense anywhere from 1 to 30 seconds using the side-mounted temperature controls. It's as easy as pressing the time button and selecting your desired setting! For easy operation and changeouts, this sauce dispenser has a simple clamp mechanism that holds your bags of cheese sauce in place while it's in use.

This dispenser requires a 120V, 450W electrical connection for operation.
