Notes & Details

This Carnival King liquid propane / field convertible 40 lb. flat bottom countertop funnel cake / donut fryer is perfect for frying funnel cakes, donuts, or other wet batter products. The flat bottom on this fryer is perfect for shallow frying wet batter products. With a 40 lb. oil capacity, this fryer is the ideal unit for restaurants, concession stands, sports stadiums, farmers markets, or carnivals. It fits (6) 8" funnel cakes at once, increasing output and profit. With an ample amount of cooking space and durable stainless steel construction, this fryer will be sure to last a long time. The convenient drip tray also doubles as a lid, keeping your fry pot safe from dust afterhours. In addition, its portable design and adjustable 4" stainless steel legs make for easy setup and breakdown before and after events!

The stainless steel front, door, sides, and mesh strainer provide ultimate durability and are resistant to rust, and the front door panel protects controls from damage. This ensures that you get the most use out of your fryer, while minimizing the time and money spent on repairs. The thermostatic temperature dial control, adjustable between 200-400 degrees Fahrenheit, allows you to keep the oil at the perfect temperature for whatever you're cooking. Plus, intuitive dial controls and snap-action thermostat provide a convenient and efficient user experience while the safety shut-off provides maximum safety.

The flat bottom design of this fryer provides unique benefits. This fryer does not have a cold zone, unlike many other fryers. This maximizes frying capacity and evenly heats all products to the perfect temperature so you can continue to provide your customers with donuts, funnel cakes, and other fried products. In addition, the products are able to float freely over the stainless steel mesh strainer as they cook, perfect for pastries or hushpuppies. Once the products have finished frying, the products can be lifted out using the mesh strainer with cool-touch handles, making it easy to batch fry.

This unit comes with a drain extension pipe to make it easier to drain your oil into an oil filtration machine or oil shuttle. This unit requires a liquid propane connection for operation.
