Notes & Details

Searching for the perfect roller grill for your small business or concession stand? Look no further than this compact Carnival King HDRG30 hot dog roller grill! It features 11 stainless steel rollers that can hold up to 30 hot dogs at a time, making it easy to keep up with customer demand at a town fair, fundraiser, gold courses, or school event. With this roller grill, guests won't be able to resist the sight and aroma of plump, juicy hot dogs, sausages, and other tasty snacks! Dual temperature controls backed by 1430W of heating power provide independent control over the front rollers and the rear rollers so that you can either prepare two different types of food at the same time, or use the separate zones to simultaneously cook and hold your most popular product.

This versatile unit isn't limited to just hot dogs either, as it can easily cook egg rolls, taquitos, sausages, and more! Allowing you to add quick, grab-and-go items to the menu without breaking the bank. End of day cleaning couldn't be any simpler thanks to a durable stainless steel construction and removable drip tray that catches excess juices and oils, as well as the rollers that just need to be wiped down with warm soapy water and a clean, soft cloth. It requires a 120V electrical connection for operation.
