Type	Refrigeration Parts

Features

- Direct replacement for original part
- Compatible with RBD3G3 and RBD5G2 refrigerated beverage dispensers (sold separately)
- Key to circulating the dispenser's refrigerant
- 110V

Notes & Details

This Carnival King 382PD5G152 compressor is a direct replacement for the one that comes standard on RBD3G3 and RBD5G2 refrigerated beverage dispensers (sold separately). The compressor is an incredibly important part of your unit's refrigeration system and keeps the refrigerant circulating through the unit during operation. If the compressor is damaged or not working it is important to replace it promptly, as failure to do so could lead to damage or premature failure in other components. This compressor requires an 110V electrical connection for operation.
