Item #382PD5G3

Technical Data

Type

Refrigeration Parts
Valves

Features

- Direct replacement for original part
- Compatible with RBD3G and RBD5G series refrigerated beverage dispensers (sold separately)
- Allows the faucet to dispense product

Notes & Details

This Carnival King 382PD5G3 faucet valve is a direct replacement for the one that comes standard on RBD3G and RBD5G series refrigerated beverage dispensers (sold separately). This stainless steel piston valve allows beverages to flow from the bowl when the lever is pressed, and it seals the bowl off when it is not in use. If this part is broken or worn it can cause dripping or leaking, which results in lost profits and a sticky, sugary mess. It's important to inspect the faucet valve regularly and replace it promptly if needed.
