Notes & Details

Make buckets of delicious popcorn for your eager customers with this Carnival King PM850 8 oz. commercial popcorn popper! You'll be producing fresh popcorn for the masses almost immediately since the stainless steel kettle, with its 850W of heating power, needs just 3-4 minutes to preheat. Once the unit begins cooking, finished popcorn falls to the popper's warming deck, which can hold up to 50 oz. of popcorn, where it's kept fresh until you're ready to serve.

That crisp, tantalizing popcorn will easily catch the customer's eye through the crystal-clear windows under the PM850 popper's LED light, which illuminates the popcorn for excellent merchandising. The powerful motor boasts impressively silent operation to give you the production you need without distracting customers.

An excellent addition to state fairs, stadiums, and fundraising events, this popper comes with a small plastic scoop and measuring spoons that makes operation a breeze right out of the box! The front, back, and side see-through clear panels that make up the cabinet are all made of heavy-duty plastic, while the removable crumb tray, kettle, and the interior top / bottom are made of stainless steel. The unit's red frame is stainless steel as well, while the top is constructed of powder-coated steel for impressive durability. The removable stainless steel kettle and kernel tray make cleaning a breeze, while the 3/4" rubber feet prevent scuff marks and provide additional stability. This unit requires a 120V electrical connection.
