# Carnival King RBD3G1 Single 3 Gallon Bowl Refrigerated Beverage Dispenser - 120V

Item #382RBD3G1

## Technical Data

Width	7 7/8 Inches
Depth	16 15/16 Inches
Height	27 15/16 Inches
Voltage	120 Volts
Capacity per Bowl	3 Gallons
Circulation Type	Paddle
Features	BPA Free
Material	Stainless Steel
Number of Bowls	1 Bowls

## Features

- Large 3 gallon BPA-free bowl with gallon markings made of virtually unbreakable polycarbonate
- Paddle system avoids froth and oxidation of beverages
- Highly efficient cooling pump and adjustable temperature control adds beverage versatility
- Stainless steel dripless pouring valve prevents post-pour messes
- Bowl and components easily removed for cleaning, no tools needed

## Technical Data

Plug Type	NEMA 5-15P
Power Type	Electric
Temperature Range	35.6 - 50 Degrees F

## Certifications

Imported from Italy

5-15P

ETL, US & Canada

ETL Sanitation

BPA Free

## Notes & Details

Quench your guests' thirsts and elevate the beverage service at your concession stand, buffet, or cafeteria with the Carnival King RBD3G1 single 3 gallon bowl refrigerated beverage dispenser! Great for iced tea, lemonade, juice, or other cold drinks, this dispenser is sure to boost beverage sales and increase your customers' thirst by showing off the refreshing drink inside. The 3 gallon polycarbonate bowl is sturdy and virtually unbreakable and gives high visibility to the contents inside. It is simple to remove for cleaning and sanitation at the end of each day.

Gallon markings on the bowl let you monitor how much liquid is being dispensed. The paddle system keeps beverages properly mixed without separating and does so without causing froth or oxidation, which otherwise compromise taste and quality. Temperature is adjustable through intuitive independent bowl controls so that you can make sure your guests are enjoying their drinks at the ideal temperature.

A stainless steel, dripless pouring valve prevents post-pour drips from making a mess and wasting product. The drip tray is removable so it can be easily emptied and cleaned as necessary. For long lasting operation, tight seal gaskets prevent any moisture or outside contaminants from entering the compressor housing. Durably constructed, the body of this dispenser as well as the evaporator are made of stainless steel. For protection, ABS plastic side panels wrap around the body to deter damage to the steel casing. It requires a 120V electrical connection for operation.
